PROFESSIONAL SUMMARY

Frontend Engineer with 1 years of experience building 3 production-grade platforms (130+ pages, 100K+ LOC) using React/Next.js. Skilled in scalable component architecture, custom RBAC, real-time Socket.IO, REST API integration, and WCAG-compliant responsive UIs. Internship foundation: 8 UI clones and 2 full-stack apps. CGPA: 9.07/10.

TECHNICAL SKILLS

Languages & Core	JavaScript (ES6+), TypeScript, HTML5, CSS3
Frameworks	React.js, Next.js 14/15, Tailwind CSS v3/v4, Bootstrap, styled-components, Framer Motion, AOS
State & Forms	React Context API, Redux, Formik, Yup, React Hook Form
API & Real-time	REST API Integration, Socket.IO, Axios (JWT auth), JWT handling
UI & Plugins	React Toastify, Select2 Dropdown, react-slick, react-quill, Plyr, react-beautiful-dnd
Charts & Export	Recharts, , xlsx (SheetJS), jsPDF + AutoTable, dom-to-image
Performance & Quality	Performance Optimization, Cross-Browser Compatibility, Browser DevTools, Responsive Design, WCAG,
Tools	Git, Vercel, Figma, Postman, ESLint

PROFESSIONAL EXPERIENCE

Frontend Engineer — ScrapaNova (B2B Scrap Metal Marketplace)

Apr 2024 – Oct 2025

Azziptech · scrapanova.com

Next.js 15, React 19, Tailwind CSS v4, Socket.IO, Axios, Recharts

- Architected dual Next.js 15 apps (B2B marketplace + 130-page admin CMS, 60K+ LOC) with real-time Socket.IO messaging, JWT-authenticated WebSocket rooms, reconnection logic, and optimistic UI updates.
- Built custom RBAC via React Context API with per-page, per-action permission gating across 100+ admin pages; integrated 50+ REST APIs with centralized Axios instance and React Toastify notifications.
- Delivered Recharts/Highcharts price analytics dashboard, custom savings calculator, and WCAG-compliant responsive layouts with verified cross-browser compatibility (Chrome, Firefox, Safari, Edge).

Frontend Engineer — GetSolar (Solar Energy Platform)

Aug – Sep 2024

Azziptech · Australian Market

Next.js 15, React, Tailwind CSS, Axios, AOS, react-slick, Select2

- Built 25+ responsive customer-facing pages and 60+ admin CMS pages with drag-and-drop content sequencing (react-beautiful-dnd + custom React 18 StrictMode compatibility wrapper).
- Implemented Select2 searchable dropdowns, session-based auto Get-a-Quote popup, AOS scroll animations with passive event listeners, and intersection-observer animated counters — improving engagement and lead capture.
- Created reusable ExportData component enabling Excel (xlsx) and PDF (jsPDF + AutoTable) export across 15+ admin pages; applied performance optimization via Next.js Image, lazy loading, and config-driven navigation patterns.

Frontend Engineer — E-SIR T (Hospital Management System)

2024

Azziptech · esirt.co.in

Next.js 15/14, React 19/18, Tailwind CSS v4, Socket.IO, Recharts, Formik, Yup

- Developed 55-page student portal and 100-page admin panel: QR-based complaint entry, patient reference CRUD, and daily logbook, equipment calibration and equipment inventory lifecycle module with stock ledger PDF reports.
- Built dom-to-image certificate generation, bulk Excel import (500+ records), Chart.js analytics, equipment calibration lifecycle, dynamic Yup schema from API fields, and Select2 hierarchical dropdowns (Course to Subject to Module) across 10+ pages using Browser DevTools for debugging.

Frontend Developer Intern

Sep 2023 – Mar 2024

Azziptech

React.js, Bootstrap, Tailwind CSS, REST APIs, Figma

- Built 8 responsive UI clones (3 Bootstrap, 5 Tailwind CSS) and 2 full-stack apps (E-Commerce Store, Student Management System) applying REST API integration and responsive web development best practices.
- Established Formik + Yup + React Toastify validation pattern adopted as team standard across all subsequent production projects.

EDUCATION

B.E. Computer Engineering — Gujarat Technological University

2021 – 2025

CGPA: 9.07 / 10 | Academic Excellence Award

KEY ACHIEVEMENTS

- Delivered 3 live production apps (130+ pages, 100K+ LOC) across B2B, healthcare, and renewable energy domains within tight timelines.
- Centralized Axios utility (auto-environment URL switching, JWT injection, 60s timeout) eliminating auth-code duplication across 100+ API calls in 3 production projects.
- Maintained cross-browser compatibility across Chrome, Firefox, Safari, and Edge using Browser DevTools debugging and progressive enhancement techniques.
